## Guard Tour Management System

**Innovative use of bar code technology provides fast and accurate accountability, tracking and reporting for use in inspection activities, security, operations and facilities management**

### UNIT COMPONENTS:

DATALOGIC MEMOR Bar Code Scanner  
Scan Exec Report Writer  
Software Manual  
Bar Code Location Labels (25)  
Scanner Case

### FEATURES:

Scanner Has 64MB Storage Capacity With A Clock & Calendar To Timestamp Activities  
Simple, Easy To Use System With Minimal User Training Required  
Generate Reports For Tracking And Accounting Of Activities  
Reports Sorted In Any Order, Such As By Personnel, Date, Time, Location, Etc.

### BENEFITS:

Cost Effective  
Increase Overall User Productivity  
Replace Hand Written Logs With Accurate Computer Generated Reports

If you've ever wanted an accurate, reasonably priced, user friendly system that will give you documented shift reports in any sequence or category, you need **Scan Exec!**

**Scan Exec's** innovative integration of a Denso BHT-8000 scanner, plus a powerful custom developed report writer is revolutionizing the way activity information is gathered, analyzed and reported.

Using a handheld scanner, security officers, inspectors, maintenance technicians and others can quickly and accurately log activities without the overhead of having to manually produce reports at the office.

**Scan Exec** not only writes shift reports for you, it will summarize the information to aid supervisors and management in noting trends and drawing conclusions.

**Scan Exec** is a general tool that can be used by any industry that needs to track: who, what, when and where. **Scan Exec's** intelligent design allows you to use it as a security system today, and an inspection system tomorrow. With all the components provided in the kit, you can customize it to your specific needs.

**Scan Exec** allows you to produce custom employee and activity bar code templates which can be updated anytime you wish.
